HOMEWORK

Adapt the Library view

```
/model
    user
    song

/repositories
    user_repository
    song_repository

/ui/states
    player_state
    settings_state

/ui/screens
    home_screen
        home_view_model
        home_content

    library_screen
        library_view_model
        library_content

    settings_screen
        settings_screen

/ui/widgets
    song_tile
```

- ✓ Update the method: Future<Song?> getSongs ()
- ✓ Simulate a **delay** of 3 seconds.
- ✓ Simulate an error when fetching the data

  As example every 2 tries, throw an exception

- ✓ Handle an AsyncValue for the list of songs

- ✓ Handle the 3 states (loading, error, success) for
  - the songs

  As example a circular progress indicator
